RESUSCITATION

Subject index

Volume 26 (1993)

acute respiratory failure, sepsis, hypothermia, respiratory distress syndrome, hypoxia, oxygen consumption, oxygen extraction, 183
advisory defibrillators, defibrillation, ventricular fibrillation, semi-automatic defibrillators, 163
age dependency of successful CPR, DNR-order, comparison of in- and out-of-hospital resuscitation, survival rate of CPR, 23
ambulance crew, automatic external defibrillator, cardiac arrest, resuscitation, 75
angiotensin II, cardiac arrest, vasopressor, CPR, 203
angiotensin, cardiac arrest, CPR, vasopressin, atrial natriuretic peptide, 261
artherosclerotic heart disease, pathophysiology, sudden death, coronary artery, thrombosis, artery spasm, myocardial scarring, myocardial hypertotrophy, autonomic nervous system, phychosocial/behavioural factors, 111
artificial respiration, mouth mask ventilation, bag valve mask ventilation, resuscitation, 13
artificial ventilation, resuscitation, bag valve mask ventilation, 173
asystole, countershock, epinephrine, cardiopulmonary resuscitation, CPR, defibrillation, cardiac arrest, 63
atrial natriuretic peptide, cardiac arrest, CPR, vasopressin, angiotensin, 261
automatic external defibrillator, ambulance crew, cardiac arrest, resuscitation, 75
autonomic nervous system, pathophysiology, sudden death, artherosclerotic heart disease, coronary artery, thrombosis, artery spasm, myocardial scarring, myocardial hypertotrophy, 111

bag valve mask ventilation, artificial respiration, mouth mask ventilation, resuscitation, 13
bag valve mask ventilation, resuscitation, artificial ventilation, 173
basic cardiopulmonary resusciation, pneumoperitoneum, complication, 177
basic life support, cardio-pulmonary resuscitation, skill retention, 193
basic life support, recovery position, complications, resuscitation, 93
basic life support, resuscitation, recovery position, complications, 89
blood lactate level, cardiopulmonary arrest, cardiopulmonary resuscication (CPR), end-tidal CO_2 ($ETco_2$), 133
brain resuscitation, hypoperfusion, no-reflow phenomenon, protein synthesis, ribosomes, selective vulnerability, treatment of ischemia, 225
brain-mediated intensive care, cardiopulmonary resuscitation, no-reflow phenomenon, 277
brain-mediated intensive care, no-reflow phenomenon, cardioplumonary resuscitation, 211
bull neck, emergency intubation, cardiopulmonary resuscitation, Combitube™, 271
by-stander, cardiac arrest, outcome, CPR, 47

cardiac arrest, ambulance crew, automatic external defibrillator, resuscitation, 75
cardiac arrest, angiotensin II, vasopressor, CPR, 203
cardiac arrest, asystole, countershock, epinephrine, cardiopulmonary resuscitation, CPR, defibrillation, 63
cardiac arrest, cardiopulmonary resuscitation, pulmonary ventilation, 125
cardiac arrest, CPR, vasopressin, angiotensin, atrial natriuretic peptide, 261

SSDI 0300-9572(93)0732-H

cardiac arrest, defibrillation, outcome, 31
cardiac arrest, human, ventricular fibrillation, rhythm changes, cardiopulmonary resuscitation, defibrillation, delays, survival, 53
cardiac arrest, magnesium, epinephrine, 3
cardiac arrest, outcome, by-stander, CPR, 47
cardio-pulmonary resuscitation, skill retention, basic life support, 193
cardioplumonary resuscitation, no-reflow phenomenon, brain-mediated intensive care, 211
cardiopulmonary arrest, cardiopulmonary resuscication (CPR), end-tidal CO_2 ($ETco_2$), blood lactate level, 133
cardiopulmonary resuscication (CPR), cardiopulmonary arrest, end-tidal CO_2 ($ETco_2$), blood lactate level, 133
cardiopulmonary resuscitation, asystole, countershock, epinephrine, CPR, defibrillation, cardiac arrest, 63
cardiopulmonary resuscitation, brain-mediated intensive care, no-reflow phenomenon, 277
cardiopulmonary resuscitation, cardiac arrest, human, ventricular fibrillation, rhythm changes, defibrillation, delays, survival, 53
cardiopulmonary resuscitation, cardiac arrest, pulmonary ventilation, 125
cardiopulmonary resuscitation, emergency intubation, Combitube™, bull neck, 271
cardiopulmonary resuscitation, emergency ventilation, intermittent positive pressure ventilation, tracheal insufflation of oxygen, 251
cardiopulmonary resuscitation, heart arrest, hypertonic saline solution, 243
cardiopulmonary resuscitation, open-chest cardiopulmonary resuscitation, non-traumatic cardiac arrest, out-of-hospital cardiac arrest, return of spontaneous circulation, 69
Combitube™, emergency intubation, cardiopulmonary resuscitation, bull neck, 271
comparison of in- and out-of-hospital resuscitation, age dependency of successful CPR, DNR-order, survival rate of CPR, 23
complication, pneumoperitoneum, basic cardiopulmonary resusciation, 177
complications, basic life support, resuscitation, recovery position, 89
complications, recovery position, basic life support, resuscitation, 93
coronary artery, pathophysiology, sudden death, artherosclerotic heart disease, thrombosis, artery spasm, myocardial scarring, myocardial hypertotrophy, autonomic nervous system, phychosocial/behavioural factors, 111
countershock, asystole, epinephrine, cardiopulmonary resuscitation, CPR, defibrillation, cardiac arrest, 63
CPR, angiotensin II, cardiac arrest, vasopressor, 203
CPR, asystole, countershock, epinephrine, cardiopulmonary resuscitation, defibrillation, cardiac arrest, 63
CPR, cardiac arrest, outcome, by-stander, 47
CPR, cardiac arrest, vasopressin, angiotensin, atrial natriuretic peptide, 261

defibrillation, asystole, countershock, epinephrine, cardiopulmonary resuscitation, CPR, cardiac arrest, 63
defibrillation, cardiac arrest, human, ventricular fibrillation, rhythm changes, cardiopulmonary resuscitation, delays, survival, 53
defibrillation, cardiac arrest, outcome, 31
defibrillation, ventricular fibrillation, semiautomatic defibrillators, advisory defibrillators, 163
delays, cardiac arrest, human, ventricular fibrillation, rhythm changes, cardiopulmonary resuscitation, defibrillation, survival, 53
DNR-order, age dependency of successful CPR, comparison of in- and out-of-hospital resuscitation, survival rate of CPR, 23

emergency intubation, cardiopulmonary resuscitation, Combitube™, bull neck, 271
emergency medical services, pre-hospital care, physicians, other EMS personnel, 109
emergency physicians, out-of-hospital cardiac arrest, EMT defibrillation, two-tiered EMS system, 39
emergency ventilation, cardiopulmonary resuscitation, intermittent positive pressure ventilation, tracheal insufflation of oxygen, 251
EMT defibrillation, out-of-hospital cardiac arrest, two-tiered EMS system, emergency physicians, 39
end-tidal CO_2 ($ETco_2$), cardiopulmonary arrest, cardiopulmonary resuscication (CPR), blood lactate level, 133
epinephrine, asystole, countershock, cardiopulmonary resuscitation, CPR, defibrillation, cardiac arrest, 63
epinephrine, magnesium, cardiac arrest, 3
euthyroid sick syndrome, hypothyroid, neurologic deficit, global cerebral ischemia, 141

global cerebral ischemia, hypothyroid, euthyroid sick syndrome, neurologic deficit, 141

heart arrest, cardiopulmonary resuscitation, hypertonic saline solution, 243
human, cardiac arrest, ventricular fibrillation, rhythm changes, cardiopulmonary resuscitation, defibrillation, delays, survival, 53
hypertonic saline solution, heart arrest, cardiopulmonary resuscitation, 243
hypoperfusion, brain resuscitation, no-reflow phenomenon, protein synthesis, ribosomes, selective vulnerability, treatment of ischemia, 225
hypothermia, sepsis, respiratory distress syndrome, hypoxia, acute respiratory failure, oxygen consumption, oxygen extraction, 183
hypothyroid, euthyroid sick syndrome, neurologic deficit, global cerebral ischemia, 141
hypoxia, sepsis, hypothermia, respiratory distress syndrome, acute respiratory failure, oxygen consumption, oxygen extraction, 183

intermittent positive pressure ventilation, cardiopulmonary resuscitation, emergency ventilation, tracheal insufflation of oxygen, 251

magnesium, epinephrine, cardiac arrest, 3
microcirculation, superoxide radical, reperfusion, polymorphonuclear leukocyte activation, tumor necrosis factor, 237
mouth mask ventilation, artificial respiration, bag valve mask ventilation, resuscitation, 13
myocardial hypertotrophy, pathophysiology, sudden death, artherosclerotic heart disease, coronary artery, thrombosis, artery spasm, myocardial scarring, autonomic nervous system, 111
myocardial scarring, pathophysiology, sudden death, artherosclerotic heart disease, coronary artery, thrombosis, artery spasm, myocardial hypertotrophy, autonomic nervous system, 111

neurologic deficit, hypothyroid, euthyroid sick syndrome, global cerebral ischemia, 141
no-reflow phenomenon, cardioplumonary resuscitation, brain-mediated intensive care, 211
no-reflow phenomenon, brain resuscitation, hypoperfusion, protein synthesis, ribosomes, selective vulnerability, treatment of ischemia, 225
no-reflow phenomenon, brain-mediated intensive care, cardiopulmonary resuscitation, 277
non-traumatic cardiac arrest, cardiopulmonary resuscitation, open-chest cardiopulmonary resuscitation, out-of-hospital cardiac arrest, return of spontaneous circulation, 69

open-chest cardiopulmonary resuscitation, cardiopulmonary resuscitation, non-traumatic cardiac arrest, out-of-hospital cardiac arrest, return of spontaneous circulation, 69
other EMS personnel, pre-hospital care, physicians, emergency medical services, 109
out-of-hospital cardiac arrest, cardiopulmonary resuscitation, open-chest cardiopulmonary resuscitation, non-traumatic cardiac arrest, return of spontaneous circulation, 69
out-of-hospital cardiac arrest, EMT defibrillation, two-tiered EMS system, emergency physicians, 39
outcome, cardiac arrest, by-stander, CPR, 47
outcome, cardiac arrest, defibrillation, 31
oxygen consumption, sepsis, hypothermia, respiratory distress syndrome, hypoxia, acute respiratory failure, oxygen extraction, 183
oxygen extraction, sepsis, hypothermia, respiratory distress syndrome, hypoxia, acute respiratory failure, oxygen consumption, 183

pathophysiology, sudden death, artherosclerotic heart disease, coronary artery, thrombosis, artery spasm, myocardial scarring, myocardial hypertotrophy, autonomic nervous system, phychosocial/behavioural factors, 111
physicians, pre-hospital care, other EMS personnel, emergency medical services, 09
pneumoperitoneum, basic cardiopulmonary resusciation, complication, 177
polymorphonuclear leukocyte activation, superoxide radical, reperfusion, tumor necrosis factor, microcirculation, 237
pre-hospital care, physicians, other EMS personnel, emergency medical services, 109
protein synthesis, brain resuscitation, hypoperfusion, no-reflow phenomenon, ribosomes, selective vulnerability, treatment of ischemia, 225
phychosocial/behavioural factors, pathophysiology, sudden death, artherosclerotic heart disease, coronary artery, thrombosis, artery spasm, myocardial scarring, myocardial hypertotrophy, autonomic nervous system, 111
pulmonary ventilation, cardiopulmonary resuscitation, cardiac arrest, 125

recovery position, basic life support, complications, resuscitation, 93

recovery position, basic life support, resuscitation, complications, 89
reperfusion, superoxide radical, polymorphonuclear leukocyte activation, tumor necrosis factor, microcirculation, 237
respiratory distress syndrome, sepsis, hypothermia, hypoxia, acute respiratory failure, oxygen consumption, oxygen extraction, 183
resuscitation, ambulance crew, automatic external defibrillator, cardiac arrest, 75
resuscitation, artificial respiration, mouth mask ventilation, bag valve mask ventilation, 13
resuscitation, artificial ventilation, bag valve mask ventilation, 173
resuscitation, basic life support, recovery position, complications, 89
resuscitation, recovery position, basic life support, complications, 93
return of spontaneous circulation, cardiopulmonary resuscitation, open-chest cardiopulmonary resuscitation, non-traumatic cardiac arrest, out-of-hospital cardiac arrest, 69
rhythm changes, cardiac arrest, human, ventricular fibrillation, cardiopulmonary resuscitation, defibrillation, delays, survival, 53
ribosomes, brain resuscitation, hypoperfusion, no-reflow phenomenon, protein synthesis, selective vulnerability, treatment of ischemia, 225

selective vulnerability, brain resuscitation, hypoperfusion, no-reflow phenomenon, protein synthesis, ribosomes, treatment of ischemia, 225
semi-automatic defibrillators, defibrillation, ventricular fibrillation, advisory defibrillators, 163
sepsis, hypothermia, respiratory distress syndrome, hypoxia, acute respiratory failure, oxygen consumption, oxygen extraction, 183
skill retention, cardio-pulmonary resuscitation, basic life support, 193
sudden death, pathophysiology, artherosclerotic heart disease, coronary artery, thrombosis, artery spasm, myocardial scarring, myocardial hypertotrophy, autonomic nervous system, phychosocial/behavioural factors, 111
superoxide radical, reperfusion, polymorphonuclear leukocyte activation, tumor necrosis factor, microcirculation, 237
survival rate of CPR, age dependency of successful CPR, DNR-order, comparison of in- and out-of-hospital resuscitation, 23
survival, cardiac arrest, human, ventricular fibrillation, rhythm changes, cardiopulmonary resuscitation, defibrillation, delays, 53

thrombosis, pathophysiology, sudden death, artherosclerotic heart disease, coronary artery, artery spasm, myocardial scarring, myocardial hypertotrophy, autonomic nervous system, phychosocial/behavioural factors, 111
tracheal insufflation of oxygen, cardiopulmonary resuscitation, emergency ventilation, intermittent positive pressure ventilation, 251
treatment of ischemia, brain resuscitation, hypoperfusion, no-reflow phenomenon, protein synthesis, ribosomes, selective vulnerability, 225
tumor necrosis factor, superoxide radical, reperfusion, polymorphonuclear leukocyte activation, microcirculation, 237
two-tiered EMS system, out-of-hospital cardiac arrest, EMT defibrillation, emergency physicians, 39

vasopressin, cardiac arrest, CPR, angiotensin, atrial natriuretic peptide, 261
vasopressor, angiotensin II, cardiac arrest, CPR, 203
ventricular fibrillation, cardiac arrest, human, rhythm changes, cardiopulmonary resuscitation, defibrillation, delays, survival, 53
ventricular fibrillation, defibrillation, semi-automatic defibrillators, advisory defibrillators, 163
